Summary

Front-End Web Developer coming from a background of working three jobs around disability care and child care, that has now allowed me to work patiently to create websites centred around the user's experience. Earned a certificate in Full Stack Development from the University of Sydney Coding Bootcamp, with developed skills in mobile responsiveness, Javascript, CSS and node.js. Quick on my feet, I learn through watching and have a passion for testing the creative bounds of web development. One of my recent projects involved team collaboration on an application that takes users out of the 'analysis paralysis' of choosing a Netflix movie by randomly generating suggestions in regards to their history, country and genres. I am driven to work in a goal-orientated environment aiming to push the limits of web design and the user experience, and have future interests in pursuing aspects of cyber security.

Skills

Proficient in Microsoft Excel, Photoshop, Word and Premier

Languages: HTML5, CSS3, Javascript (jQuery), Python, MongoDB, MySQL, node.js and React.js

Projects

Netflix Roulette || <https://github.com/4gerger/Project.github.io> || Screenshots on Portfolio

This single-page application aims to take the analysis paralysis out of choosing a Netflix film, by offering a user random movies from Netflix based on the user's past searches, selected genres and country. It provides a synopsis, movie posters, a mobile touch-responsive carousel and movie rating. I was responsible as team lead for committing Ajax calls into functions, and creating dynamic JQuery elements as search results inside the carousel, as well as some CSS3 and Materialize designs. Languages/techniques used: HTML5, CSS3, Bootstrap, Materialize, Ajax, JQuery

Coding Quiz || <https://github.com/lisaostman/quiz> || <https://lisaostman.github.io/quiz/>

A coding quiz made to improve my Javascript, html, CSS3 and API knowledge - whilst simultaneously testing yours! The user can choose between a HTML, CSS or Javascript Quiz, and save their high score to their local storage if they beat it. As a solo project, I worked on the Javascript logic, dynamically generated JQuery objects, creative design and quiz myself.

Languages/techniques used: HTML5, CSS3, Bootstrap, JQuery

Experience

English Tutor, 10/05/18 – 27/07/19

Capra Coaching

Organising lecture structures for multiple students through the term, developing my ability to handle multiple students and therefore study schedules at once.

Disability Carer, 22/07/18 – 08/02/19

Self Employed – Employer: Maria Perosh

Caring for clients' daily schedules, dealing with behavioural situations, and multi-tasking under pressure.

Before/After School Care Educator, 22/07/18 – 08/02/19

PrimaryOSHCare – Employer: Sareen and Luke

Caring for 120 children in the afternoon between K-6 on any given day. Cleaning up and administrative duties, including planning day activities, recording lesson evaluations and filing records.

English Tutor, 01/02/18 – 01/02/19

Number Works'n'Words – Employer: Tim Tolvanen

Taught classes of 4 students between ages of 6- 16 years old. Had to complete lesson plans, record sheets and learning outcomes for 24 students. Worked alongside students with disabilities and behavioural issues. This developed my patience and organisation skills.

Bartender/Waitress, 27/03/18 – 08/08/18

Hillside Hotel – Employer: Matt Dagg

Developed interpersonal skills working alongside a team of 60 people and switching between floor and bar duties. Receptionist work in using excel to plan table seatings, bookings and events. Learnt organisational skills and ways to provide excellent customer service

Sales Representative, 28/03/16 – 21/08/17

Autobarn, Dural – Employer: Graham

Developed customer conflict resolution, research skills for locating and recommending car parts, upselling and team building.

Education

Bootcamp Certificate: University of Sydney. A six-month intensive program that develops knowledge in HTML, CSS3, Javascript, JQuery, Bootstrap, Node Js, MySQL, MongoDB and ReactJS.
